- **MANAGED SERVICE PROVIDER**

EXPECT MORE FROM YOUR IT MANAGED SERVICES PROVIDER

Your **business** is unique with its own capacity. Don't be satisfied with the same old solutions as other companies. Fridell Solutions is a Managed Services Provider offering IT infrastructure build-out and maintenance, upgrades and support, cloud-based services, strategic IT consulting including disaster recovery planning and IT project management.

HOW OUR MANAGED SERVICE LOOKS LIKE:

Complete Network setup, monitoring, and maintenance preventing any downtime.

Website development, maintenance and basic SEO services (most CMS systems)

Managed cybersecurity, anti-virus, and anti-spam, network and workstation support.

Onsite Service and collaborative support for third-party software, OS, and applications.

Microsoft patch management, validation, service pack and software versioning.

Annual Business Review and Strategy meeting designed to align IT with your business strategy

Multiple methods of contact, 24-hour emergency IT support.

Proactive alerts and notifications of mission-critical devices via our Network Operations Center

Disaster Recovery planning, Managed backups and restores.

Detailed reporting on systems and provided services.

Managed servers, firewalls, networks, VoIP and cloud services.

CIO-level planning, sourcing, and guidance for project proposals, onsite consulting.
